Career Objectives

Motivated and dedicated BSc (Hons) Computing student with strong skills in Python, Java, and web development. Experienced in building academic software projects including management systems, GUIs, and REST APIs. Passionate about backend development and problem-solving. Seeking opportunities to apply technical skills, grow as a developer, and contribute to impactful software solutions.

Education

BSc (Hons) Computing Itahari International College (IIC), Itahari, Nepal	Ongoing
High School (+2) Vishwa Aadarsha College, Itahari, Nepal	2081
Secondary Education Examination (SEE) Pashupati English Boarding School, Itahari, Nepal	2078

Experience

Python Developer (Academic Project) – WeCare Beauty Store Management System

Jan 2025 – Apr 2025

- Developed a store management system using Python with modular programming.
- Implemented invoice generation, file handling, stock updates, and “Buy 3 Get 1 Free” logic.
- Improved code structure for better scalability and maintainability.

Java Developer (Academic Project) – Gym Membership Management System (Swing GUI)

May 2025 – July 2025

- Built a Java Swing GUI system to manage members using OOP concepts.
- Implemented file handling for efficient data storage and retrieval.
- Enhanced UI with validation and real-time feedback.

Projects

E-Commerce Website (Watches) – HTML & CSS

- Designed and developed a static e-commerce website for watches using HTML and CSS.
- Created responsive layouts and user-friendly interface for product display.
- Improved frontend design skills and understanding of web structure.

Library Management System – MERN Stack

- Developed a web-based library system using MongoDB, Express.js, React, and Node.js.
- Implemented CRUD operations for managing books and users.
- Built REST APIs for efficient data handling.

Irrigation System using IoT Devices

- Developed an automated irrigation system using IoT sensors to monitor soil moisture levels.
- Implemented automatic water supply control based on real-time data.
- Improved water efficiency and reduced manual intervention.

Hamro Bus – Web Application Project

February 2026

- Developed a bus booking and management system to streamline transportation services.
- Implemented features like route management, seat booking, and schedule tracking.
- Built REST APIs and handled backend logic for efficient data processing.

Skills

Soft Skills: Problem-solving, Teamwork, Communication, Time Management, Adaptability, Critical Thinking, Fast Learner

Technical Skills: Python, Java, Java Swing, JavaScript, HTML, CSS, MERN Stack, Django & DRF (Beginner), Git & GitHub
